

Senior DotNet developer

alltitude SA is a professional service company. For over 15 years, we've been contributing to the success of our clients' projects through the quality of our consultants' work. Our approach is established on the respect of human values and long-term relationships with our employees and customers.

To assist one of our clients in the growth of its activities, we are looking for a senior .Net developer.

Your duties:

- Develop and maintain software products, as prioritised in our release schedule.
- As a member of a small development team using our standard design processes and procedures contribute to system design, development, testing and deployment.
- Maintaining and supporting corporate applications
- Coach the offshore team located in Asia (approximately 10 people) and make sure the quality of the work is as expected

Your profile:

- 5+ years .Net development experience
- Knowledge of .Net / SQL (mongoDB or elasticsearch or rabbitMQ is also an asset)
- In depth understanding of OO principles and Agile/Scrum practices
- Experience with the development of single page applications
- Highly organized and possess problem solving skills. Experience with working with an offshore or nearshore team is a strong asset
- Fluent in English and French

Localization : Lausanne

Type of contract : CDI

Start date : Negotiable
