

Project Manager-Business Analyst (Data protection field)

alltitude SA is a professional service company. For over 15 years, we've been contributing to the success of our clients' projects through the quality of our consultants' work. Our approach is established on the respect of human values and long-term relationships with our employees and customers.

To assist one of our clients in the growth of its activities, we are looking for a Project Manager/Business Analyst for a 4 month mission (80% or 100% activity rate, according to your preference).

Your duties:

- Analyze and map the existing data protection processes and design new ones according to internal procedures from the legal team
- Responsible for the implementation (change management) and the sustainability of these processes (contacts with different functional teams)
- Act as project manager for various data protection projects

Your profile:

- You hold a master's degree in IT, Economics or Business Management
- You have a strong experience as a project manager and have already dealt with data protection projects
- You have previous experience in change management and justify strong communication skills.
- You speak english fluently (official working language). Any other language is a plus.
- You are available to start mid-january at the latest for a 4 month mission

Localization : Geneva

Type of contract : 4 month mission

Start date : First week of january ideally
